Project Phase two
Chongju Mai & Zhengwen Yuan
The learning system for teachers and students.

Main page (index.php):

This page is the main page for the project, all users see this page first while using.
The page has a navigation bar that have the login and sign up option. And some introduction of how to use this website. Introductions are given for both role of teachers and students.

Signup page (signup.php):

This page designed for user sign up, if they do not have an account. Page do not support role distributing. It is not safe to give any user teacher role if they wanted. So teachers are getting special authority from admins.

Login page (login.php):

The login page is for user to login. All website function are not available until user login in to their account.

Course page (course.php):

This page is displaying all the material teacher uploaded for the course. Content will show up when selected course from side bar. Student are able to preview and download all the content shown here. Teachers are able to do everything students are capable of, and also deleting and uploading file with comments.

Content page (content.php):

The content page opens when students clicked preview, and it will show the preview of the document if available. And download function can be performed here, as well.

Setting page (account.php):

This page allows users to modify the setting of the account. Providing the function such as change password, change portraits, etc.

Navigation bar:

There will be two navigation bars used across almost all the pages. The first is top bar. The top bar provide login and sign up function when user have not login yet. After login, the bar will provide the functionality allow people to logout.

The second bar is the side bar. The side bar's main functionality is to select course teacher or students need to get access to. And the side bar also allow   user to return home page or go to settings.
